

Doteasy KB

How do I change my DNS settings?

If your domain is registered with Doteasy:

Login to your Member Zone and select the Change Web Host function.

Then, enter in your new primary and secondary hostname information as provide by your new web host.

DNS changes may take up to 48 hours to fully take effect.

Please note that changing your DNS settings does not automatically terminate your Doteasy web hosting services or hosting account. To cancel your Doteasy hosting services, please contact us.

If your domain is not registered with Doteasy:

You will need to contact your domain registrar to make the necessary DNS changes.
