

Doteasy KB

How soon after I have settled my account re-activation before my website will be restored?

Your account services will be reactivated upon the completion of your account reactivation request. However, due to DNS propagation, please allow up to 24 hours for your website to be fully accessible and visible from all networks.

Please contact us if it has been over 24 hours since your account reactivation and you are still unable to access your account services.
