

Doteasy KB

How do I add the Doteasy Hosted Blog to my website?

The Doteasy Hosted blog is a Doteasy hosted application. This means that all scripting and database configurations have already been taken care of, and all you need to do is activate the blog on your account. You can login to your Doteasy Member Zone to activate your Doteasy Hosted Blog.

Login to Member Zone to activate your Doteasy Hosted Blog. Complete the Blog admin account creation.

Your blog URL will be `http://apps.yourdomain.com/blog`

We have an online tutorial that gives you step-by-step instructions on how to activate, setup, customize and manage your blog.
