

Doteasy KB

How many email accounts can I setup for my domain?

The number of email accounts you can setup for your domain depends on your hosting package.

On the Basic Hosting plan, you are limited to 10 email accounts and a total of 100 MB of email storage. With Doteasy SmartMail, you can distribute your email storage any way you wish. For example, if you only need 5 email accounts, you can assign a 20 MB quota to each of these 5 email accounts.

On the Ultra Hosting plans, you are limited to 100 email accounts, and a total of 1 GB email storage space.

On the Unlimited Hosting plans, you are entitled to an unlimited number of email accounts. Your total email storage quota is 10 GB.
