

Doteasy KB

I am currently subscribed to the MailPro service. What will happen to my email services upon the upgrade?

- The MailPro Email Service entitles you a 10 MB per account email storage upgrade. However, with the Doteasy SmartMail, email storage will be on a per domain basis. This means that you can assign individual email storage quotas for each of your accounts. When you upgrade to our MailPro Email Service, you will receive an additional 2 GB email storage upgrade for your domain. This means:
 - Doteasy Basic Hosting package with MailPro Service - you will have 2100 MB email storage to be distributed amongst your email accounts (up to 10 email user accounts)
 - Ultra Hosting package with MailPro Service - you will have 3 GB email storage to be distributed amongst your email accounts (up to 100 email user accounts)
 - Unlimited Hosting package with MailPro Service - you will have a total of 12 GB email storage to be distributed amongst your email accounts

Please contact us if this applies to you, so that we can follow-up on this email storage upgrade for your account.
