How do I configure my OSX Mail?

1. Open Mail from the Dock.
 2. Select Preferences from the Mail menu.
 3. From the Accounts window click Add Account.
 4. Define your accounts settings as follows:
 - Account Type: POP Account
 - Description: Enter a description for the account.
 - Email Address: Your full email address
 - Full Name: Your name
 - Incoming Mail Server: mail.yourdomain.com
 - User Name: userID@yourdomain.com
 - Password: email password
 - Outgoing Mail Server: mail.yourdomain.com
