Doteasy KB

How do I install the Doteasy Commerce?

You don't need to install the Doteasy Commerce System yourself. We'll take care of it for you.
Installation
Once we have obtained your order confirmation, we will have the Doteasy Commerce system installed on your account. If you require the Unlimited Hosting service, it will be added to your account at this time as well.
Initial Setup
We will complete the Doteasy Commerce system inital setup for you. The initial setup includes the activation of the Doteasy Commerce shopping cart on your hosting account and the installation of your SSL certificate, if you have included the GeoTrust Premium SSL Certificate in your order.
Admin Area Activation
Once your Doteasy Commerce system is installed and ready to go, we will activate your Admin Area login. We will send you the link to the Admin Area login panel. You can then login to your Doteasy Commerce system, upload your products and begin selling.
