

**Can I install a content management system on my Unlimited Hosting account?**

Yes, the Unlimited Hosting plan offers PHP and MySQL support, which most of the content management systems require.

In fact, the Unlimited Hosting plan includes the Softaculous script installer which will allow you to install most content management systems, such as WordPress, Joomla, and Drupal, with just a few simple clicks. To see how you can use Softaculous to install your content management system, please watch this video:
