

## **Doteasy KB**

### **Do I need to have a digital camera to use the Doteasy Hosted Gallery service?**

No, you are not required to have a digital camera to use the Doteasy Hosted Gallery. You can digitize traditionally processed prints by scanning and saving them onto your computer. Make sure you save the images in JPEG/JPG, GIF or PNG formats. Once the prints are saved onto your computer, you can then add them to your photo gallery using the upload function in your Doteasy Hosted Gallery.
