Restoring your site using the Backup Wizard

This feature allows you to restore parts of your website by uploading the backup files that you've previously downloaded from the backup wizard.

1. Click on the Backup Wizard button under Files.
2. Select Restore from the first page.
3. Select the portion of your site you would like to restore.
4. Select the file from your computer that should be used to restore the portion of your website that you have selected.
5. Click Upload to finish the restoration process
