How to manage the Raw Access Logs

The Raw Access Log manager is where you tell the system how to manage the Raw Log files that are generated daily for your account.

1. Click the Raw Access Logs icon under Logs.
2. For this tutorial, let's tell the system to archive logs every month. Click the checkbox.
3. Click the Save button.
4. Click on the Go Back link.
5. Here you will find a list of all available Raw Access Logs that you can download and use in your favorite statistics program for analysis.
5. Click on the archive that you want to download and click OK on the download window to download the logs.
