How do I change my domain's A Record?

You can change your domain's A Record or any other records with your DNS Zone file by doing the following:
1. Login to Member Zone.
2. Click the "Edit DNS Zone File (Advanced Users)" link that's under the "Domain Settings" section. If you're logging into your Master Account, you will need to click on the domain name first before you can see this option.
3. A new page will appear and you can add, edit or delete A Records for your domain.
Please be sure to click the "Publish DNS Records" button once you're done in order to save the changes.
