

Doteasy KB

Can I change the Gallery footer?

Yes, you can modify your Gallery footer.

The Gallery footer contains the following sections:

- a) Gallery Links - these are the Gallery's main navigational link. Some of these links cannot be removed, but you can edit the wording and/or style.
- b) Service Links - these are links to the other Doteasy Hosted Applications, which includes the Forum, Blog and WebForms. If you have activated any of these applications, these links will take your visitors directly to your application.
- c) Your Links - this is where you can add your own links. Links can be any external URLs.

To change the Gallery description, login to your Gallery admin panel and,

1. Click on the footer section you want to modify.
2. To change the links in that section, click on the Edit Content button. This will open the "Edit Link Content" window
3. To change the style of the links in that section, click on the Edit Style button.
