I spelt my domain name wrong. Can I change it?

Once a domain name is registered, it can't be modified or cancelled. If you want to change your domain name for any reason, you'll need to register for the new name as a separate domain instead.

Nowadays, there are so many variations on how to spell different names and words, there's no way for us to tell if the spelling on a domain name is intentional or not. That's why we register each domain exactly the way it was submitted. So, we definitely recommend that you make sure the domain is spelt exactly the way you want it to be before submitting your application.
