

Doteasy KB

Can I use my existing domain with Doteasy's web hosting service?

Yes, you can. If you already have a domain name registered, you can sign-up for our Transfer Hosting service. This option allows you to use our hosting services with a non-Doteasy domain name.

Sign-Up Process:

Select the Use My Own Domain Name (Transfer your Hosting to Doteasy) option on the sign up form and proceed with the hosting plan desired.

Activation:

Once your Transfer Hosting request has been received and processed, the system will send you an email containing the necessary DNS and Domain Technical Contact changes that you'll need to make in order to complete the activation process.

These changes simply notify your domain name handler that all you will be using Doteasy's web hosting services for your domain name. The Transfer Hosting process does not include the transfer of your domain registration to Doteasy.
